Exp no: 10 a . Inter Networking with Routers in CISCO
17.09.26 , Packet Tracers Simulator

AIM:
To design and configure a simple internetwork using a router in CISCO Packet Tracer and test connectivity between two PC's.

PROCEDURE:

Step 1: Configure Router 1

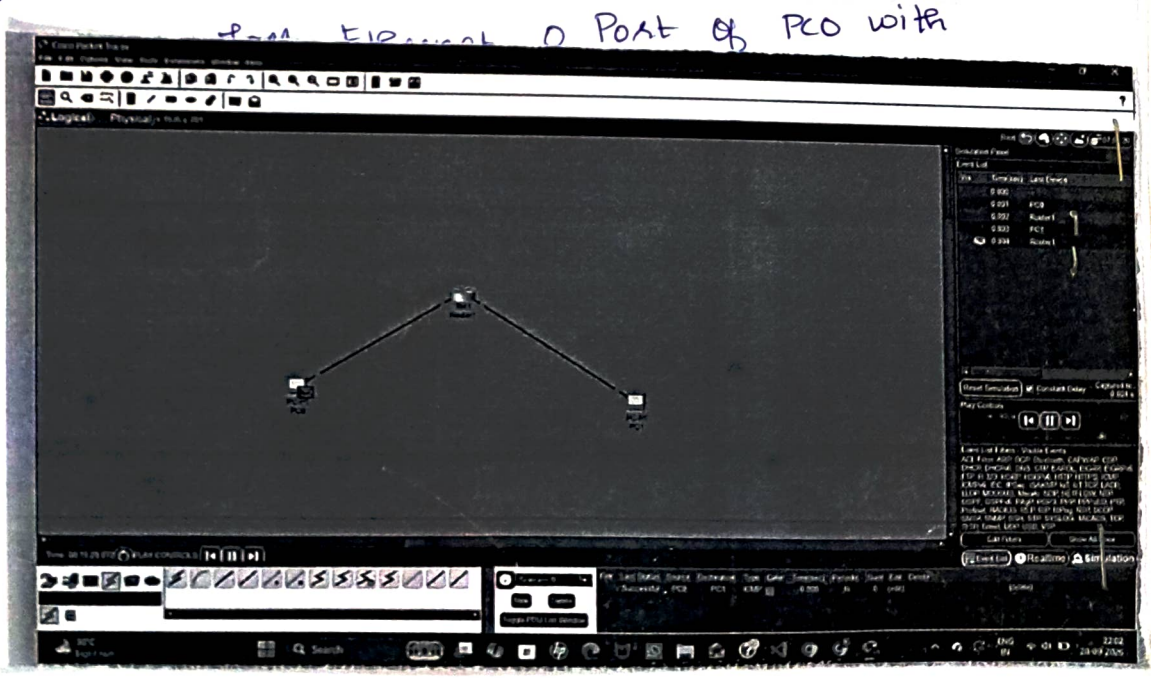

- Select the Router and Open CLI
- Press Enter to start Configuring Router 1
- Type enable to activate the priviledged mode.

Step 2:

- Assign IP address to every PC in the network
- Select the PC, GO to desktop and select IP configuration and assign IP address, default gateway, subnet mask.
- Assign the default gateway of PC's 192.168.10.1
- Assign the default gateway of PC as 192.168.20.1

Step 3:

Fa[illegible] 0 Port of PC0 with

10.(b) Design and configure an internetwork using wireless router, DHCP server and internet cloud.

AIM:

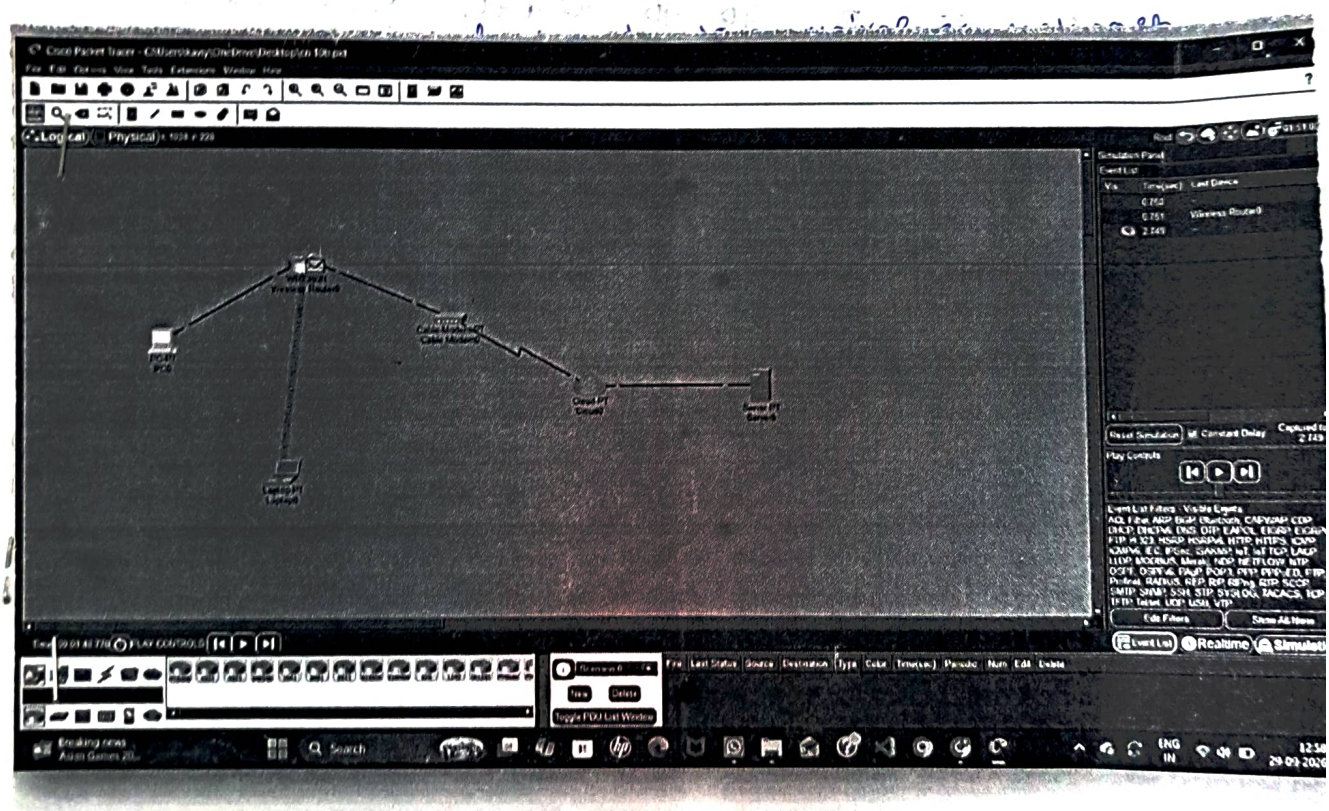

To design and configure an internetwork using a wireless router, DHCP server and internet cloud in Cisco Packet Tracer.

PROCEDURE:

→ Open Cisco Packet Tracer and create the required network topology.

→ Connect PC, laptop, wireless router, cable modem, Internet cloud and server.

→ Configure the wireless router with SSID homenetwork and enable DHCP.

RESULT:

The internetwork was successfully designed and configured using a wireless router, DHCP serves and Internet cloud
