Packet Tracer Tool.

AIM: To study the Packet tracer tool Installation and User Interface design simple network.

PROCEDURE:

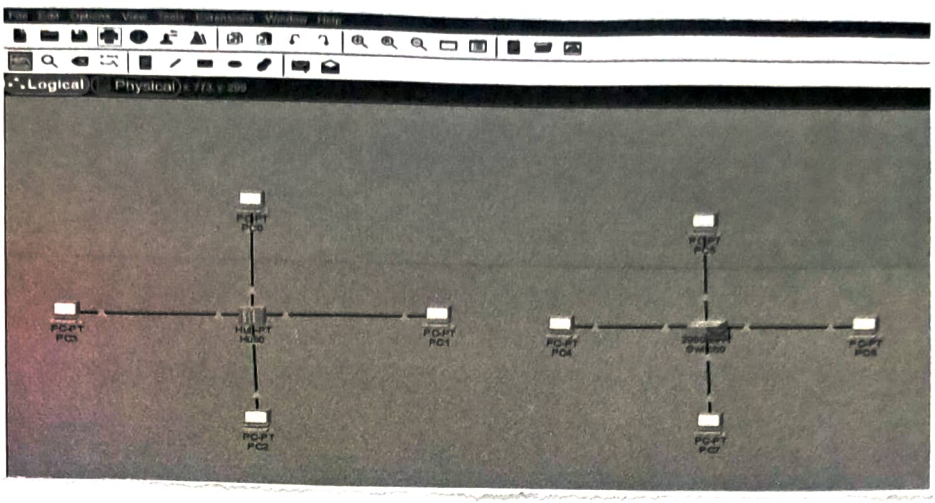

1. From the network component box, click and drag and drop the below components.

   a. 4 Generic PCs and 1 Hub
   b. 4 Generic PCs and 1 Switch.

2. Click on connections
   * Click on copper straight through cable.
   * Select one of the PC and connect it to HUB using the cable. The link LED should glow in green, indicating the link is up. Similarly connect remaining 3PCs to the HUB.
   * Similarly connect 4 PCs to the switch using copper straight-through cable.

3. Click on the PCs connected to hub, go to the Desktop tab, click on IP configuration, and enter an IP address and subnet mask. Here, the default gateway and DNS server information is not needed as there are only two end devices in the network click on the PDU (message icon) from the common tool bar,
   a. Drag and drop it on one of PC (source machine) and then drop it on another PC
   b. Observe the flow of PDU from source PC to destination PC by selecting the Realtime mode of simulation.
   c. Repeat step 3 to steps for the PCs connected to the switch.
   d. Observe how HUB and switch are forwarding the PDU and write your observation and conclusion

about the behaviours of switch and HUB.

RESULT:

Thus the packet tracer tool installation and user interface overview has been successfully completed.
